

BINARY OPTIONS

fx.fpcc.world

WHAT IS BINARY OPTIONS?

Binary Options - Binary Options. This is a relatively new financial instrument, with a fixed value and a predetermined potential profit and loss. Binary Options is a tool suitable for beginner traders, traders can know in advance the income before placing an order and just need to determine the price movement trend when placing an order.

Binary Options are only considered to be predictions of the future so winning or losing will almost depend on the level of luck. There is no formula or rule to win. This is the same thing for betting. If you win, you will receive a large amount of assets based on the assets you bet.

DEPOSIT- WITHDRAW

1. DEPOSIT: ETH, USDT, FPCC

2. WITHDRAW: ETH, USDT, FPCC

VOLUME TRADE OF F1 IN THE WEEK
